PERRY COUNTY GOLD MINES.

Last week we noticed the arrival of Mr. D. Mondschine, of the firm of Herstine & Mondschine, merchants at Perryville. He came from his home and was burdened with a large assortment of silver ore specimens from a piece of land near Perryville, which himself and partner had purchased of the Little Rock and Fort Smith Railway company for a mere song. After passing a day or two in the city exhibiting the ore to our experts, he went to St. Louis, where he had half a dozen pieces carefully analyzed. The result was much more favorable than he anticipated, the assayer informing him that the precious metal was there in paying quantities. Before leaving the Future Great he had received several applications from capitalists for an interest. We understand that work will commence at these mines about the first of next month. We wish the boys every success and trust their find may prove a regular mint.
