

The new department store of I. Freeman, corner Lake avenue and Superior street is fast reaching that point of completion which will enable them to throw open their doors to the public for their inspection. It has been a lively corner the past few weeks and especially so since their removal from the old stand. A visit paid there yesterday found their entire force as busy as they could be unpacking and preparing case after case of new goods of all descriptions. It is a colossal establishment but Mr. Freeman has filled it well. We anticipate for those of our readers who attend their opening next week some delightful surprises.
