Breakdown in Hale Mine—Local Joys and Sorrows of Range Town Epitomized.

News Tribune Correspondence:

BIWABIK, Sept. 27.—A petition asking the village council to provide an ordinance for the ringing of a curfew bell at 8:30 p. m. from October to April, and 9 p. m. for the rest of the year, has been generally circulated among our citizens by a number of the ladies during the past week, and many signatures have been secured. The petition will probably be presented to the council at its next meeting, which is next Monday evening, and it will undoubtedly be granted by them.

A cog wheel in the hoisting machinery at the Hale mine broke Monday evening shortly after the night shift had gone on, causing that mine to close down until repairs could be made, and throwing about eighty men out of work for a few days. The wheel had been running tightly for some little time, when it should have run loosely, and has given considerable trouble. A new wheel was sent for at once, and it is expected that the machinery will be in running order again by Friday. The Hale has worked very steadily all summer, and shipped considerable ore. This is the first shut-down this season, and it is expected that both the Hale and Kenawha mines will work about their present force during the coming winter.
