

WORK ON MAMMOTH STORE IS BEGUN AT CLOQUET

CLOQUET, Minn., Aug. 24.—B. I. Summerfield commenced work this week on his new building on the corner of Arch street and Avenue C.

The structure will be of concrete blocks, which will be manufactured by the Superior Pressed Stone and Building company at Superior and shipped to Cloquet. The building will be one-story, but it will be 24 feet high—almost as high as two-stories. The dimensions are 60x100 feet. The Avenue C frontage will be entirely plate glass and the display windows will extend 35 feet on the Arch street side of the building.
