TAKE THEM OUT.

Or Feed Them on Food They Can
Study On.

When a student begins to break
down from lack of the right kind of
food, there are only two things to do;
either take him out of school or feed
him properly on food that will rebuild
the brain and nerve cells. That food
is Grape-Nuts.

A boy writes from Jamestown, N. Y.,
saying, "A short time ago I got into a
bad condition from overstudy, but
Mother having heard about Grape-Nuts
Food began to feed me on it. It satis-
fied my hunger better than any other
food, and the results were marvelous.
I got fleshy like a good fellow. My
usual morning headaches disappeared,
and I found I could study for a long
period without feeling the effects of it.

After I had been using Grape-Nuts
Food for about two months I felt like
a new boy altogether. My face had
been pale and thin, but is now round
and has considerable color. I have
gained greatly in strength as well
as flesh, and it is a pleasure to study
now that I am not bothered with my
head. I passed all of my examinations
with a reasonably good percentage, ex-
tra good in some of them, and it was
Grape-Nuts that saved me from a
year's delay in entering college.

Father and Mother have both been
improved by the use of Grape-Nuts
Food. Mother was troubled with sleep-
less nights, and got very thin, and
looked careworn. She has gained her
normal strength and looks, and sleeps
well nights." Don E. Cooper.
