

WILL EXPLORE TRACT FOR AN IRON MINE

Max Shapiro of Duluth and a number of associates have taken options on 24 forties on the Vermillion range in 61-15 and will explore the land for iron. The land is situated from one to two miles east of Soudan. Two diamond drills will be put at work at once, and others may be added later. The feeling in mining circles that mines should be found between Soudan and Ely is strong, but no ore bodies of commercial size have been discovered. The Shagawa mine, formerly known as the section 30 property, which is near Ely, is turning out well and is having some influence in inducing others to explore elsewhere on the Vermillion.
