

STRIKE IRON ORE IN LARGE QUANTITIES

(Range Bureau of the News Tribune.)

SPARTA, April 19.—Local men interested in a lease on eighty acres just outside of Mt. Iron believe that they have struck iron ore in large quantities. Since taking the lease they have been test-pitting and at 64-foot level a good quality of ore was encountered yesterday, with the result that the men interested gave an order for a diamond drill. The property will now be thoroughly explored. A previous test pit struck taconite at 70 feet, but it is believed that the real thing has now been found. The Sparta men who believe they have struck it rich are D. M. Mouscr, Charles Gustafson, C. M. Campbell, Louis Rubenstein, Solomon Sax, Frank Rabinowitz and George Stepitch, of Eveleth, are also interested.
