

GARDEN EMBELLISHES

EVELETH BUSINESS BLOCK

EVELETH, April 28.—An example that is receiving favorable comment here is the improvement Solomon Sax is making in the rear of his building, occupied by the Miners National bank. He is having the back part of the lot filled in with dirt taken from the excavation of the armory and when this is finished he will proceed with the cultivation of a vegetable and flower garden. When it is noticed what improvements this makes in this property it is expected that other property owners along Grant avenue will fall in line.
