Petroleum deposits of considerable extent have been discovered near Eitape in the southwest of German New Guines, and the whole territory has, subject to the consent of the imperial council, been declared a close reserve in order that no mining claims may be established by private individuals or concerns. It is expected that the reichstag will vote \$125,000 to be spent by the local authorities in boring and prospecting. Nothing definite so far is known concerning the quality of the petroleum or the extent of the supply.
