## COCONUT OIL FINE FOR WASHING HAIR

If you want to keep your hair in good condition, the less soap you use the better. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain mulitested coconut oil (which is pure and odorless), is much better than soap or anything else you can use for shampooing, as this can possibly injure the hair. Simply moisten your hair with water and rub it in. One or two teaspoonfuls will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage. You can get mulitested coconut oil at most any drug store. It is very cheap, and a few ounces is enough to last everyone in the family for months.
