

Millinery Colors Are High Shades, Plume

High shades, bird of paradise, and flame are to be the leaders in millinery this fall, according to Mrs. Oreck, who has returned from New York with her son, Percy Oreck. Most of the Parisian models are trimmed with broad ostrich plume and bird of paradise, Mrs. Oreck said. This season will be the biggest in ostrich plumes for a number of years. A new material is being introduced in millinery, called "dovener," which is similar to dovetine, only softer and with a heavier knapp.
